Objective

Data Analyst with experience in retail healthcare analytics, specializing in Power BI dashboards, KPI tracking, and business analysis. Strong in Python, SQL/MySQL, Excel, and Google Sheets, delivering actionable insights for pricing, inventory planning, and operational decision-making.

Technical Skills

- **Languages:** Python, SQL, DAX
- **Databases:** MySQL
- **Visualization Tools:** Power BI (Desktop & Service), Tableau, Excel (Power Query, Pivot Tables, Power Pivot)
- **ETL & Data Modeling:** Power Query, Data Warehousing, Data Modeling, KPI Tracking
- **Other Tools:** GitHub, Google Sheets, ChatGPT
- **Core Concepts:** Data Cleaning, Transformation, Business Insights, Statistical Analysis, MIS Reporting

Experience

Dawaa Dost Pvt. Ltd. — Data Analyst, Jaipur

June 2025 - Present

- Analyzed store-wise, category-wise, and SKU-level retail healthcare sales data using Google Sheets, Excel, and Power BI to track performance across multiple stores.
- Designed and maintained automated Power BI dashboards connected to cleaned datasets, tracking sales growth, margin %, inventory turnover, stock gaps, and category contribution.
- Automated daily, weekly, and monthly MIS reports using Google Sheets (QUERY, ARRAYFORMULA, FILTER, VLOOKUP/XLOOKUP) and Power Query, reducing manual reporting effort by 30–40%.
- Built dynamic helper sheets in Google Sheets to calculate top-selling items, slow-moving SKUs, and store-wise performance, enabling faster dashboard refreshes.
- Supported pricing optimization and inventory planning by analyzing fast/slow-moving items, stock-out trends, and margin variations across stores.
- Delivered ad-hoc insights and management reports by combining Google Sheets automation and Power BI visuals, supporting operational and strategic decisions.

Zeetron Networks Pvt. Ltd. — Data Analyst Intern, Jaipur

July – Dec 2024

- Analyzed large datasets to uncover sales trends, customer behavior, and profitability insights.
- Performed data cleaning, transformation, and visualization using SQL, Python (pandas), and Power BI.
- Developed interactive dashboards and reports to support business decision-making.
- Delivered actionable insights to stakeholders, enabling data-driven business decisions.

Projects

Hospitality Performance Insights Dashboard | Tools: Python, MySQL, Power BI

- Scraped and cleaned 50K+ booking records using Python, transforming raw data into structured MySQL tables.
- Built a Power BI dashboard to track ₹1.71B total revenue, highlighting that Mumbai contributed 39.1%.
- Applied DAX measures to identify peak occupancy months and seasonal pricing patterns.
- Insights enabled management to optimize pricing strategy, improving forecast accuracy and boosting profitability.

Shopping Mall Sales Analysis

- Tools: Python (Pandas), SQL | Skills: Data Analysis, Statistical Analysis
- Cleaned and transformed raw CSV sales data for department-wise insights.
- Used SQL queries to segment 1,000+ customers, analyze product categories, and uncover seasonal shopping patterns.
